Along with Mickey Mouse and Asterix, Tintin is one of the world's most recognizable cartoon characters. If you haven't read any of his adventures, you are missing a real pleasure. The clean, crisp art style that defines modern European comics is almost entirely the influence of Hergé. Considered to be one of Hergé's masterworks, *Tintin in Tibet* is a great book for both old and new fans of Tintin. It is compelling, exciting, and spiritually rewarding in the way that the best comics stories can be.
